ADPLICANTE D'ANDTEA, Alan
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR THE DIAGNOSIS OF CANCER SUSCEPTIBILI
TITLE OF INVENTION: DEFECTIVE DNA REPAIR MECHANISMS AND TREATMENT THEREOF
FILE REPERENCE: 7032/2055
CURRENT APPLICATION NUMBER: US/10/165,099
CURRENT FILING DATE: 2002-06-06
PRIOR APPLICATION NUMBER: US 09/998,027
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö

Sequence 8, Application US/09841366A
Sequence 9. Application US/09841366A
GENERAL INFORMATION:
APPLICANT: Bacher, Jeffery W.
APPLICANT: Planagan, Laura
APPLICANT: Nassif, Nadine
TITLE OF INVENTION: DETECTION OF MICROSATELLITE INSTABILITY AND ITS USE IN
TITLE OF INVENTION: DAGNOSIS OF TUMORS
TITLE OF INVENTION: DAGNOSIS OF TUMORS
TILLE PEPERRENCE: 16026-9267
CURRENT APPLICATION NUMBER: US/09/841,366A
CURRENT FILING DATE: 2001-07-16
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       FILE REPERENCE: PC007C2

Sequence 15, Application US/10204254A

Publication No. US20030176649A1

GENERAL INFORMATION:

APPLICANT: VIKKULA, Mikka

TITLE OF INVENTION: UWGLOM gene and its mutations causing disorders with a vascular of PILE REPERENCE: DELCES9.001APC

CURRENT PILING DATE: 2002-08-16

PRIOR PELING DATE: 2001-02-16

PRIOR PELING DATE: 2000-02-16

PRIOR APPLICATION NUMBER: 00870022.1

PRIOR APPLICATION NUMBER: 60/195,777

PRIOR APPLICATION NUMBER: 60/195,777

PRIOR PELING DATE: 2000-04-10

PRIOR PILING DATE: 2000-14-10

PRIOR PELING DATE: 2000-14-10

PRIOR PELING DATE: 2000-14-10

SOFTWARE PATENTION NUMBER: 00870320.9

PRIOR PILING DATE: 2000-13-13

SOFTWARE PATENTION NUMBER: 0200-13-13
